

HEALTH

" Health is life. "

The sauna originated from Finland. The traditional Finnish bathroom was built outdoors and constructed into a small hut from hewn logs. A steel oven was placed in the centre of the room, from which the steam was produced by heating stones by firewood, and dousing them with water. This steam bath is beneficial to health, beauty and a clear mind.

With ever-increasing demands on our work-lives and increasing levels of pollution, it has now become essential to focus on our health, and many of us seek the services of gyms and health centers to achieve our health and beauty aspirations, which can become cost prohibitive over the long term.

Now, with the development of new technologies and our innovative production methods, Ultra Spa brings you sauna and steam options that you can enjoy in the privacy of your own homes and at affordable prices.

Benefits of Sauna & Steam

Sauna baths ease fatigue, stimulate your energy centers and promote healthy metabolism and increase blood circulation. It is exceptionally beneficial to beauty maintenance by opening up skin pores and strengthening perspiration. The intra-corporeal toxin and fat in the under layers of the skin can be cleansed out of our bodies and keeps the skin looking young.

Sauna also helps in rheumatoid arthritis and helps dredge meridians. A longer sauna session even consumes more calories helping to achieve that perfect body. Research over the past decades has proven sauna and steam are essential to maintaining a healthy lifestyle and mind.

You will love the feeling of comfort, the relaxation and clean sensation with your ultraspa steam room.

The warm soothing heat raises your body temperature and increases your heart rate, expanding capillaries, allowing increased flow of oxygen rich blood throughout your body. Skin and muscle cells regain elasticity.

Many people find that sauna and steam use help relieve mental fatigue, joint and muscle pain. Enjoy your ultraspa today, email us on: spa@ultraeq.com.

STEAM ROOM ACCESSORIES

Essence steam outlet. Add the essence bag, and enjoy as it integrates with the steam to calm and relax you

Steam outlet. Transfer the steam into the cabin through the steam generator
